WorldScape, Incorporated names Daniel Poore as Executive Vice President of Sales and Business Development

Marlton, NJ, January 19, 2004...WorldScape Incorporated announces that Daniel Poore has joined the executive management team as EVP of Sales and Business Development. Mr. Poore has a distinguished 20 year career in sales, management and executive management in technical and commercial markets with companies such as Hewlett-Packard, Sun Microsystems, Netscape Communications and AVCOM Technologies.

With a degree in Electrical Engineering from Rutgers University, Mr. Poore has a solid understanding of technology and has focused his past efforts on High Performance Computing, High Availability, Storage Area Networks, Database and Networking.

Prior to WorldScape, Poore ran sales WW for AVCOM Technologies, an Integrator and Professional Services organization focused on the products of Sun Microsystems, Cisco, Veritas, Hitachi, Oracle and many more, where he took sales from \$40M per year to over \$300M per year within 3 years.

“I feel that the addition of Mr. Poore will take WorldScape in the next logical direction of focus on commercial business markets and universities engaged in various levels of research and involvement in government related programs. He will have responsibility for the development of the WorldScape sales infrastructure including hiring, sales process methodology including systems to support this, branding and linkage into the ongoing success of WorldScape Defense.” – said Pete Rogina, CEO WorldScape, Inc.

“WorldScape will offer the opportunity to build the sales and management team with a clean slate to craft an organization with the utmost in professionalism, past accomplishment and sense of business ethics. Having closely watched WorldScape’s progress over the last 5 years, I’m excited to have the opportunity to join a company with such great momentum at a time of potentially explosive growth”. - said Mr. Poore.

BACKGROUND

WorldScape Inc. and its wholly owned subsidiary, WorldScape Defense Company, LLC are developing and deploying high-performance applications and hardware including real world based immersive imaging solutions. The company is also developing a suite of commercially available products and services based on the underlying massively parallel technology. WorldScape Defense is located in Marlton, New Jersey.
